The backup application helps you to restore your files by creating a duplicate of the corrupted database file. It supports Windows and Windows Server operating systems. Also, the application runs on a single application installation file. Therefore, you don't have to download the database file to your computer. The application comes with a wizard-based interface that provides a very simple and easy way to restore the database. Moreover, you can get the backup file by selecting the desired backup option. The backup application can also be used to create a database backup. If you want to check the database backup, then you need to right-click on the application icon and select the View Backup option. Now, a database file will open in the application interface. By using the wizard-based interface, you can easily access your database files and create a duplicate of the database file. The software is well-known for its simplicity. Therefore, the user can start the application using any of the two methods. The user can also import the database file by selecting the Import option. The next step is to specify the location of the database file and then select the database file. The application will start importing the database file and it will display a success message. The program also displays the details of the imported database file, including the type, size, location, and date created. At last, we have to mention that the users can choose the desired file format for the backup. The application supports most of the file formats. However, if you need any particular format, then you need to go for a third-party application. It can be used to protect your personal files and data and make sure that you don't lose any data. The software provides the best option to create the backup of the database. The interface of the application is very simple to use and offers lots of options. It can be downloaded from www.appvn.com. Summary: • Automatically backs up your important data. • Protects you from losing data. • Import the database file or backup the existing database. • Create database backup by creating a backup file. • The backup will be ready within no time.Local News Hot Topics: At least four injured in shooting at Pittsburgh synagogue By Melissa Cronin Associated Press Posted: 06/21/2018 03:36:35 AM MDT Updated: 06/21/2018 03:36:35 AM 82157476af
